

Tips to help you succeed in this online course

Follow these simple tips and you'll do better in your online math learning. They may seem pretty basic, but they'll help keep you focused and on track.

- Familiarize yourself as much as possible with our course components on BB.
- Spend some time just navigating your way through the math software and making sure you can figure out what the buttons are for, and where to find everything.
- Be aware of and keep up with the weekly course schedule.
- Create your own learning space, preferably quiet and away from distractions.
- Schedule time to study your math lessons; stick to your schedule.
- Complete all the assigned homework problems and go over all the assigned examples.
- Do not assume that an online course will be easier than a regular classroom course.
- Do not procrastinate...Do not fall behind! It is harder to catch up on lost time than to stay on top of things.
- Note all due dates; complete assignments on time.
- Work ahead of the schedule so that you can build some flexibility in the schedule.
- Time your tests wisely.
- Don't give up. Math can be challenging, particularly when you are alone...remember that your professor is here to help you succeed!
- Check my emails frequently!
- Check our course WebCT site often for new announcements and handouts.
- Contact me whenever you have questions about any aspect of this course...be proactive.
- Take advantage of the College's math support centers.
- Make the most of this experience!
- Enjoy learning math from home!
