This concerns the Peer Evaluation component of your group statistics project. Please reply with the full names of the other members of your statistics project group along with the amount of points that you have assigned for each of them. All assignment of points shall be in whole numbers. For example, an assignment of 3.5 points is not acceptable.

If you have 1 other person in your group (2 group members total) then you would assign between 0 and 12 points to that other group member. No more than 12 points should be given by you to that other group member.

If you have 2 other people in your group (3 group members total) then you would assign between 0 and 6 points to each other group member. No more than 6 points should be given by you to any other group member.

If you have 3 other people in your group (4 group members total) then you would assign between 0 and 4 points to each other group member. No more than 4 points should be given by you to any other group member.

The amount of points given by you does not have to be the same for each other group member. You will be “grading” them on their individual merits.

For example, John Stokes, Pat Murphy and Marisa Gonzales are in a group together. Pat thinks that John contributed a huge amount of work, and feels that Marisa could have done a bit more. Because there are two other group members, Pat can assign between 0 and 6 points to each person. Pat Murphy’s Peer Evaluation is as follows:

- John Stokes: 6 points
- Marisa Gonzales: 4 points

Some things to consider:
- How many scheduled meetings did the group member attend?
- Did the group member have good communication with the rest of the group?
  (Responding to e-mails, phone calls, etc.)
- How much did the group member contribute to the discussion of the stats project?
- Did the group member submit any assigned work?
- Was the work provided on time?
- Was the submitted work complete/incomplete?
- To what extent was any submitted work accurate/inaccurate?

Please be honest and understanding when assigning grades. Do not let your personal feelings (whether positive or negative) influence your evaluation of their performance.

Please submit the Peer Evaluation to me, via e-mail, no later than Thursday, Dec. 10, 2009. Feel free to e-mail me if you have any questions/concerns.
