

Sorting Data in Your Calculator

After entering the data into L1, to sort the data set by first selecting the **STAT** button, the following should appear.

```
3:000 CALC TESTS
1:Edit...
2:SortA(
3:SortD(
4:ClrList
5:SetUpEditor
```

To sort the data set in ascending order follow these steps:

Select **2: SortA(** and the following screen should appear.

```
SortA(█
```

To select the correct list press **2ND** button followed by the **1** key, then close the parenthesis, which produces **Screen 1** below. Press enter and the following should appear on **Screen 2** below.

```
SortA(L1)
```

Screen 1

```
SortA(L1) Done
█
```

Screen 2

To view the sorted list select the **STAT** button, then select **EDIT** .

L1	L2	L3	1
51	-----	-----	
56			
62			
63			
65			
66			
75			
L1(1)=51
