Home — 223.10.10.1/30 — ISDN — 223.10.10.2/30 — Office

Home LAN
ID: 10.10.10.0/24

Office LAN
ID: 10.10.11.0/24
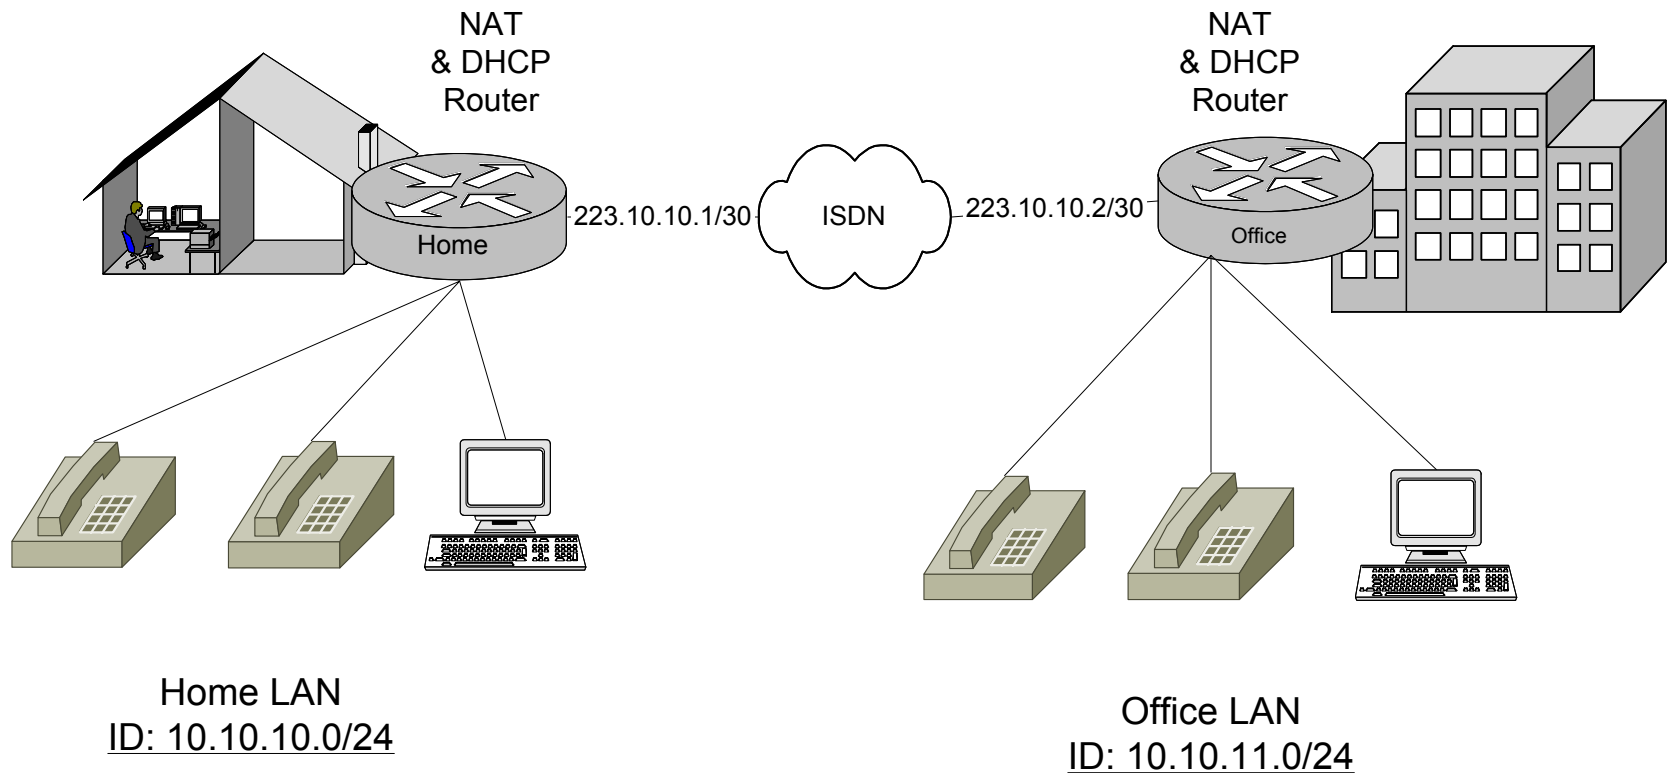

Configure an ISDN WAN connection (using legacy dial-on-demand routing) between the Home office and the HQ office which will be used to support voice and data communications between the two locations. Network Address Translations and Dynamic Host Configuration Protocol will be used at the two locations. Test your configuration by placing a call between the two locations and transferring files at the same time.
